

Aya Khlif — Full Stack Developer

Full Stack Software Engineer — NestJS · Next.js · React · Laravel · PostgreSQL

Email: ayakhlif222@gmail.com · Phone: +963 930 256 230 ·

Location: Hama, Syria (open to remote)

Portfolio: aya1khlif.github.io/MyPortfolio

Professional Summary

Full Stack Software Engineer with 5+ years of experience building SaaS platforms, government ERP systems, e-commerce, delivery and real-estate solutions for clients in Saudi Arabia, UAE, Qatar, Iraq, Egypt, Sweden, Germany, China and Syria.

Currently a Full Stack Software Engineer at Hama Governorate, where I build and maintain internal government systems, most notably the governorate ERP (finance, budgeting, procurement and HR workflows). Previously worked on a multi-tenant SaaS product at Wasmware using NestJS, Next.js, PostgreSQL, Traefik and an API gateway, including payment gateway integration and ZATCA Phase 2 (Fatoora) e-invoicing compliance.

Strong across the full lifecycle, from requirements analysis and system design to deployment and maintenance, with hands-on work in real-time features (WebSockets, Firebase), payment integrations and AI chatbots.

Professional Experience

Full Stack Software Engineer — Hama Governorate | Oct 2025 – Present

Build and maintain several internal systems for the governorate, the main one being a government ERP.

ERP modules include finance (fiscal years, payment orders, revenue collection, budget amendments), budget line items and account codes, procurement and maintenance (purchase requests, tenders, committees, supplier portal) and HR-driven workflows such as employee advances.

Work directly with stakeholders and QA to turn administrative procedures into multi-step approval workflows.

Full Stack Developer — Wasmware | Feb 2026 – Sep 2026

Developed features for a multi-tenant SaaS platform built with NestJS, Next.js and PostgreSQL behind Traefik and an API gateway.

Integrated payment gateways.

Implemented ZATCA Phase 2 (Fatoora) e-invoicing integration with the Saudi Zakat, Tax and Customs Authority.

Full Stack Web Developer — Extend IT Solutions | Sep 2023 – Present

Develop and maintain enterprise web systems for clients in Qatar, Egypt and Syria: real-estate platforms, e-commerce stores, delivery apps and internal management tools.

Currently working on MotoBox, a delivery platform with live driver tracking (WebSockets) and push notifications (Firebase).

Built front ends with React.js, Tailwind CSS and Bootstrap on Laravel back ends; integrated payment gateways and Facebook Graph API automations.

Freelance Full Stack Developer | 2021 – Present

Delivered web systems for clients in Saudi Arabia, UAE, Iraq, Sweden, Germany, China and Syria.

Projects include accounting and shipping-container management, jewelry management, medical platforms and company task management.

Full Stack Web Developer — Master Coders | 2022 – 2023

Built real-estate management systems, sports club websites with AI chatbots (Rasa, Flask, Python) and internal admin platforms.

Full Stack Web Developer — Maitech | 2021 – 2022

Delivered custom web projects across several industries, improving functionality and user experience.

Front End & Full Stack Developer Trainee — Focal X | 2023 – 2024

Completed intensive front-end training (GPA 77%) and moved into full-stack development; led programming teams.

Key Projects

Hama Governorate ERP — government financial, budgeting, procurement and HR system with multi-stage approvals, auto-generated payment orders and structured account codes.

SaaS Platform (Wasmware) — NestJS, Next.js, PostgreSQL, Traefik, API gateway. Payment gateway integration and ZATCA Phase 2 e-invoicing.

MotoBox Delivery Platform — React Native, Laravel, WebSockets, Firebase. Live driver tracking, automated order status updates and push notifications.

Circuit Store Qatar — Laravel e-commerce with Qatar-specific payment gateways and ERP integration.

Real Estate Management System — Laravel, React.js, Tailwind CSS. Property listings, sales, admin portal and secure email confirmations.

AI Chatbot & Sports Club Website — Python, Flask, custom-trained Rasa bot for user queries.

Other systems — Accounting and import/export shipping-container management, jewelry management (Al-Dahik), municipal needs management, medical platforms, company task management.
